QUVA PHARMA

Expanded RFID Portfolio for Pre-Tagged, Ready-to-Administer Injectables
Powered by GS1 Standards

EXPANSION

From intake into inventory, all the way through administration at the patient level, the critical information you need at your fingertips

Simplify inventory management across healthcare systems with RFID embedded, pre-tagged product labels

- Leveraging GS1's technology agnostic global standards unlocks instant compability with medication management platforms and other RFID supported technologies that read GS1 RFID labels, including
    - IntelliGuard™
    - AmerisourceBergen's Medication Tray
    - Healthcare Logistics' Stat Stock™
- Drive visibility for products throughout the supply chain and inside the hospital
- Enhance safety in dispensing and administration
- Reduce manual data inputs
- Gain efficiencies in inventory management

Quva Pharma RFID tagged products
